

Consolidated Financial Statements

Prepared by Management

Years Ended December 31, 2011 and 2010

MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

The accompanying consolidated financial statements of Endeavour Silver Corp. ("the Company") have been prepared by management in accordance with International Financial Reporting Standards (IFRS), and within the framework of the significant accounting policies disclosed in the notes to these consolidated financial statements.

Management, under the supervision and participation of the Chief Executive Officer and the Chief Financial Officer, have a process in place to evaluate disclosure controls and procedures and internal control over financial reporting as required by Canadian and United States securities regulations. We, as CEO and CFO, will certify our annual filings with CSA and SEC, as required in Canada by Multilateral Instrument 52-109 and in the United States as required by the Securities Exchange Act of 1934, respectively.

The Board of Directors is responsible for ensuring that management fulfills its responsibilities for financial reporting and is ultimately responsible for reviewing and approving the consolidated financial statements. The Board carries out its responsibility principally through its Audit Committee which is independent from management.

The Audit Committee of the Board of Directors meets with management to review results of the consolidated financial statements and related financial reporting matters prior to submitting the consolidated financial statements to the Board of Directors for approval. The Audit Committee reviews the consolidated financial statements and MD&A; considers the report of the external auditors; assesses the adequacy of internal controls, including management's assessment; examines the fees and expenses for audit services; and recommends to the Board the independent auditors for appointment by the shareholders. The independent auditors have full and free access to the Audit Committee and meet with it to discuss the audit work, financial reporting matters and our internal control over financial reporting. The Audit Committee is appointed by the Board of Directors and all of its members are independent directors.

INDEPENDENT AUDITORS' REPORT OF REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Directors of Endeavour Silver Corp.

We have audited the accompanying consolidated financial statements of Endeavour Silver Corp., which comprise the consolidated statements of financial position as at December 31, 2011, December 31, 2010 and January 1, 2010, the consolidated statements of comprehensive income (loss), changes in equity and cash flows for the years ended December 31, 2011 and December 31, 2010, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of Endeavour Silver Corp. as at December 31, 2011, December 31, 2010 and January 1, 2010, and its consolidated financial performance and its consolidated cash flows for the years ended December 31, 2011 and December 31, 2010 in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board.

ENDEAVOUR SILVER CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(expressed in thousands of US dollars, unless otherwise stated)

1. CORPORATE INFORMATION

Endeavour Silver Corp. (the “Company” or “Endeavour Silver”) is a corporation governed by the Business Corporation Act (British Columbia). The Company is engaged in silver mining in Mexico and related activities including acquisition, exploration, development, extraction, processing, refining and reclamation and in exploration activities in Chile. The address of the registered office is #301 – 700 West Pender Street, Vancouver, B.C., V6C 1G8.

2. BASIS OF PRESENTATION

These consolidated financial statements have been prepared in accordance with and using accounting policies in full compliance with International Financial Reporting Standards (“IFRS”) issued by the International Accounting Standards Board (“IASB”) and Interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”), effective for the Company’s reporting for the year ended December 31, 2011. These are the Company’s first consolidated financial statements prepared in accordance with IFRS and IFRS 1 *First-time adoption of International Financial Reporting Standards* has been applied.

Subject to certain transition elections disclosed in Note 22, we have consistently applied the same accounting policies in our opening IFRS statement of financial position as at January 1, 2010 and throughout all periods presented, as if the policies had always been in effect. Note 22 discloses the impact of the transition from Canadian Generally Accepted Accounting Principles to IFRS on our reported financial position, operating earnings and cash flows, including the nature and effect of significant changes in accounting policies from those used in our Consolidated Financial Statements for the year ended December 31, 2010. IFRS 1, which governs the first-time adoption of IFRS, generally requires accounting policies to be applied retrospectively to determine the opening statement of financial position on our transition date of January 1, 2010 and allows certain exemptions on transition to IFRS. The elections that are considered significant to the Company and we have applied are disclosed in Note 22.

The Board of Directors approved the financial statements for issue on March 15, 2012.

These consolidated financial statements are presented in the Company’s functional currency of US dollars including the accounts of the Company and its wholly owned subsidiaries Endeavour Gold Corporation S.A. de C.V., Endeavour Capital S.A. de C.V. SOFOM ENR, Minera Santa Cruz Y Garibaldi S.A de C.V., Metalurgica Guanacevi S.A. de C.V., Minera Plata Adelante S.A. de C.V., Refinadora Plata Guanacevi S.A. de C. V., Minas Bolanitos S. A. de C.V., Guanacevi Mining Services S.A. de C.V., Recursos Humanos Guanacevi S.A. de C.V. and Minera Plata Carina Spa. All significant intercompany transactions and balances have been eliminated.

3. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies below have been applied consistently to all periods presented and by all subsidiaries in the group.

(a) **Currency Translation**

The functional and reporting currency for the Company and its subsidiaries is the US dollar. Transactions in currencies other than an entity’s functional currency are recorded at the rates of exchange prevailing on dates of transactions. Monetary assets and liabilities that are denominated in foreign currencies are translated at the rates prevailing at each reporting date. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date the fair value was determined. Non-monetary items that are measured in terms of historical costs in a foreign currency are not re-translated. Foreign currency translation differences are recognized in profit or loss, except for differences on the re-translation of non-monetary available-for-sale instruments which are recognized in other comprehensive income.

(b) **Use of estimates and judgements**

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant areas requiring the use of management judgement relate to the determination of mineralized reserves, plant and equipment lives, estimating the fair values of financial instruments and derivatives, estimating the fair value of convertible debentures components, impairment of long-lived assets, reclamation and rehabilitation provisions, recognition of deferred tax assets, and assumptions used in determining the fair value of non-cash stock-based compensation. Actual results could differ materially from those estimates.

ENDEAVOUR SILVER CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(expressed in thousands of US dollars, unless otherwise stated)

(c) Financial instruments

Financial assets and financial liabilities, including derivatives, are measured at fair value on initial recognition and recorded on the statement of financial position. Measurement in subsequent periods depends on whether the financial instrument has been classified as financial assets at fair value through profit or loss, held for trading, available-for-sale financial assets, held-to-maturity, loans and receivables, financial liabilities at fair value through profit or loss or financial liabilities measured at amortized cost.

Financial assets and liabilities at fair value through profit or loss are measured at fair value with changes in those fair values recognized in net earnings. Financial assets and financial liabilities considered held-to-maturity, loans and receivables, and other financial liabilities are measured at amortized cost using the effective interest method. Available-for-sale financial assets are measured at fair value with unrealized gains and losses recognized in other comprehensive income. Derivative instruments, including embedded derivatives, are recorded on the statement of financial position at fair value. Changes in the fair values of derivative instruments are recognized in net earnings.

Realized gains and losses on short term metal derivative transactions are presented as Investment and other income.

(d) Fair value of financial instruments

The fair values of the Company's cash and cash equivalents, receivables, and accounts payable and accrued liabilities approximate their carrying values due to their short terms to maturity. Investments, consisting of money market investments, marketable securities and notes are recorded at fair value with unrealized gains and losses at the reporting date recognized in comprehensive income unless unrealized losses are indicative of impairments in value.

(e) Cash and cash equivalents

Cash and cash equivalents consist of deposits in banks and highly liquid investments with an original maturity at the date of the purchase of no more than ninety days or are readily convertible into cash. Cash and cash equivalents are classified as loans and receivables.

(f) Marketable securities

Marketable securities include investments in shares of companies and other investments capable of reasonably prompt liquidation. Share investments are classified as available-for-sale and carried at fair value with unrealized gains and losses at the reporting date recognized in comprehensive income.

(g) Inventories

Product inventories are valued at the lower of average production cost and net realizable value. Work-in-process inventories, including ore stockpiles are valued at the lower of average production cost and net realizable value, after an allowance for further processing costs. Finished goods inventory characterized as Dore bars or concentrate is valued at the lower of average production costs and net realizable value. Materials and supplies are valued at the lower of cost and replacement cost. Similar inventories within the consolidated group are measured using the same method, and the reversal of previous write-downs to net realizable value is required when there is a subsequent increase in the value of inventories.

(h) Mineral properties, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses. The cost of mineral properties, plant or equipment items consists of the purchase price, any costs directly attributable to bringing the asset to the location and condition necessary for its intended use and an initial estimate of the costs of dismantling and removing the item and restoring the site on which is located. Mineral properties include direct costs of acquiring properties (including option payments) and costs incurred directly in the development of properties once the technical feasibility and commercial viability has been established.

Exploration and evaluation costs are those costs required to find a mineral property and determine commercial feasibility. These costs include costs to establish an initial mineral resource and determine whether inferred mineral resources can be upgraded to measured and indicated mineral resources and whether measured and indicated mineral resources can be converted to proven and probable reserves. Project costs related to exploration and evaluation activities are expensed as incurred until such time as the Company has defined mineral reserves. Thereafter, costs for the project are capitalized prospectively as capitalized exploration and evaluation costs in property, plant and equipment. The Company also recognizes exploration and evaluation costs as assets when acquired as part of a business combination, or asset purchase with these assets recognized at cost.

ENDEAVOUR SILVER CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(expressed in thousands of US dollars, unless otherwise stated)

Capitalized exploration and evaluation costs for a project are classified as such until the project demonstrates technical feasibility and commercial viability. Upon demonstrating technical feasibility and commercial viability, and subject to an impairment analysis, capitalized exploration and evaluation costs are transferred to capitalized development costs within property, plant and equipment. Technical feasibility and commercial viability generally coincides with the establishment of proven and probable reserves; however, this determination may be impacted by management's assessment of certain modifying factors.

Where an item of plant and equipment comprises major components with different useful lives; the components are accounted for as separate items of plant and equipment.

Plant and equipment are recorded at cost and amortized using the straight-line method at rates varying from 10% to 30% annually. The accumulated costs of mineral properties that are developed to the stage of commercial production are amortized using the units of production basis using proven and probable reserves (as defined by National Instrument 43-101).

The Company conducts an annual assessment of the residual balances, useful lives and depreciation methods being used for property, plant and equipment and any changes arising from the assessment are applied by the Company prospectively.

(i) Impairment

The Company's tangible assets are reviewed for an indication of impairment at each statement of financial position date. If indication of impairment exists, the asset's recoverable amount is estimated. An impairment loss is recognized when the carrying amount of an asset, or its cash-generating unit, exceeds its recoverable amount. A cash-generating unit is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets. Impairment losses are recognized in profit and loss for the period.

The recoverable amount is the greater of the asset's fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

An impairment loss is reversed if there is an indication that there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized. An impairment loss with respect to goodwill is never reversed.

Management periodically reviews the carrying value of its mineral properties with internal and external mining related professionals. A decision to abandon, reduce or expand a specific project is based upon many factors including general and specific assessments of reserves, anticipated future prices, anticipated future costs of exploring, developing and operating a producing mine, expiration term and ongoing expense of maintaining leased mineral properties and the general likelihood that the Company will continue exploration. The Company does not set a pre-determined holding period for properties with unproven reserves. However, properties which have not demonstrated suitable mineral concentrations at the conclusion of each phase of an exploration program are re-evaluated to determine if future exploration is warranted and their carrying values are appropriate.

If any area of interest is abandoned or it is determined that its carrying value cannot be supported by future production or sale, the related costs are charged against operations in the period of abandonment or determination that the carrying value exceeds its fair value. The amounts recorded as mineral properties represent costs incurred to date and do not necessarily reflect present or future values.

(j) Reclamation and rehabilitation obligations

The Company recognizes provisions for statutory, contractual, constructive or legal obligations associated with the decommissioning and reclamation of mineral property, plant and equipment, when those obligations result from the acquisition, construction, development or normal operation of the assets. A liability is recognized at the time environmental disturbance occurs and the resulting costs are capitalized to the corresponding asset. The provision for reclamation and rehabilitation obligations is estimated using expected cash flows based on engineering and environmental reports prepared by third-party industry specialists and is discounted at a pre-tax rate specific to the liability. The capitalized amount is amortized on the same basis as the related asset. The liability is adjusted for the accretion of the discounted obligation and any changes in the amount or timing of the underlying future cash flows.

ENDEAVOUR SILVER CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(expressed in thousands of US dollars, unless otherwise stated)

In subsequent periods, the liability is adjusted for any changes in the amount or timing of the estimated future cash costs and for the accretion of discounted underlying future cash flows. The unwinding of the effect of discounting the provision is recorded as a finance cost in the income statement.

(k) Revenue recognition

Mineral revenue, based upon prevailing metal prices, is recognized upon delivery when title and risk of ownership of metals or metal bearing concentrate passes to the buyer and when collection is reasonably assured. Revenue is subject to adjustment upon final settlement of metal prices, weights and assays. Historically any such adjustments have been insignificant.

(l) Stock based payments

The Company has a share option plan which is described in Note 13(d). The Company records all stock-based compensation for options using the fair value method with graded vesting. Under the fair value method, stock-based payments are measured at the fair value of the consideration received or the fair value of the equity instruments issued or liabilities incurred, whichever is more reliably measurable, and are charged over the vesting period. The amount recognized as an expense is adjusted to reflect the actual number of share options for which the related service and vesting conditions are met. The offset is credited to contributed surplus. Consideration received on the exercise of stock options is recorded as share capital and the related contributed surplus is transferred to share capital. For those options that expire or are forfeited after vesting, the amount previously recorded in contributed surplus is transferred to retained deficit.

(m) Income taxes

The Company follows the asset and liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, and losses carried forward. Deferred tax assets and liabilities are measured using substantively enacted or enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the substantive enactment date. Deferred tax assets are recognized to the extent that recovery is considered probable.

(n) Earnings per share

Basic earnings per share is computed by dividing the earnings/(loss) available to common shareholders by the weighted average number of shares outstanding during the period. For all periods presented, profit available to common shareholders equals the reported profit. The Company uses the treasury stock method for calculating diluted earnings per share. Under the treasury stock method, the weighted average number of common shares outstanding used for the calculation of diluted earnings per share assumes that the proceeds to be received on the exercise of dilutive share options and warrants are used to repurchase common shares at the average market price during the year.

(o) Changes in accounting standards

In October 2010, the IASB issued amendments to IFRS 7 – *Financial Instruments: Disclosures* that improve the disclosure requirements in relation to transferred assets. The amendments are effective for annual periods beginning on or after July 1, 2011, with earlier application permitted. The Company does not anticipate this amendment to have a significant impact on its consolidated financial statements.

In December 2010, the IASB issued an amendment to IAS 12 – *Income Taxes* which provides a practical solution to determining the recovery of investment properties as it relates to the accounting for deferred income taxes. This amendment is effective for annual periods beginning on or after July 1, 2011, with earlier adoption permitted. The Company does not anticipate this amendment to have a significant impact on its consolidated financial statements.

In June 2011, the IASB issued amendments to IAS 1 – *Presentation of Financial Statements* (“IAS 1”) that require an entity to group items presented in the statement of other comprehensive income on the basis of whether they may be reclassified to profit or loss subsequent to initial recognition. For those items presented before tax, the amendments to IAS 1 also require that the tax related to the two separate groups be presented separately. The amendments to IAS 1 are effective for annual periods beginning on or after July 1, 2012, with earlier application permitted. The Company does not anticipate this amendment to have a significant impact on its consolidated financial statements.

(expressed in thousands of US dollars, unless otherwise stated)

4. CASH AND CASH EQUIVALENTS

Cash and cash equivalents of the Company are comprised of bank balances and highly liquid investments that are readily converted to cash with an original maturity of 90 days or less.

	December 31 2011	December 31 2010	January 1 2010
Bank balances	\$ 63,215	\$ 25,253	\$ 22,889
Short term deposits	12,219	42,784	3,813
	\$ 75,434	\$ 68,037	\$ 26,702

5. INVESTMENTS

	December 31 2011	December 31 2010	January 1 2010
Money market investments	\$ 16,473	\$ 20,009	\$ -
Notes receivable:			
Carrying value	2,133	2,133	2,133
Unrealized gain (loss)	1,074	953	-
Unrealized foreign exchange gain (loss)	275	465	343
	3,482	3,551	2,476
Investment in marketable securities, at cost	17,173	35	1,828
Unrealized gain (loss) on marketable securities	(2,960)	41	150
Unrealized foreign exchange gain (loss)	(69)	5	67
	14,144	81	2,045
	\$ 34,099	\$ 23,641	\$ 4,521

The money market investments are designated as held for trading, are classified as Level 1 (see note 21) in the fair value hierarchy and have original maturities greater than 90 days and maturities less than one year.

At December 31, 2011 the Company held Canadian dollar denominated restructured Asset Backed Commercial Paper Notes (the "Notes") that were obtained in February 2009 from the restructuring of Canadian Asset Backed Commercial Paper ("ABCP").

Notes	Maturity Dates	Interest Rate	Face Amount	Dec 31, 2011 Market Value	Dec 31, 2010 Market Value	Jan 1, 2010 Market Value
MAV II Class A-1	July 15, 2056	BA - 0.5%	\$ 3,219	\$ 2,242	\$ 2,334	\$ 1,629
MAV II Class A-2	July 15, 2056	BA - 0.5%	1,093	675	705	525
MAV II Class B	July 15, 2056	BA - 0.5%	198	104	84	-
MAV II Class C	July 15, 2056	BA + 20.0%	140	47	15	-
IA Tracking Class 15		BA - 0.5%	464	414	413	322
			\$ 5,114	\$ 3,482	\$ 3,551	\$ 2,476

The Company has classified the Notes as Level 1 in the fair value hierarchy and as available for sale. Management has recorded the Notes at their estimated fair market value with the impact of fair value fluctuations and any related foreign exchange gains or losses recognized in other comprehensive income, unless such gains or losses are declines in value that are concluded to be impairments, in which case the declines will be charged to operations. During 2007 and 2008, prior to an active market being established and the restructuring of the ABCP, the Company recorded a total impairment charge to operations of \$2,700.

The marketable securities are classified as Level 1 in the fair value hierarchy and as available for sale. The fair value of available for sale investments are determined based on a market approach reflecting the closing price of each particular security at the reporting date. The closing price is a quoted market price obtained from the exchange that is the principal active market for the particular security.

Work in process inventory	315	294	396
	\$ 34,195	\$ 12,883	\$ 6,032

(1) The Company has stockpiled 130,000 tonnes of mined ore as of December 31, 2011 (December 31, 2010 – 110,000 tonnes).

(2) The Company held 980,109 silver ounces and 5,407 gold ounces as of December 31, 2011 (December 31, 2010 - 127,097 and 957, respectively). These ounces are carried at cost, however as at December 31, 2011, the quoted market value of the silver is \$27,619 (December 31, 2010 - \$3,893) and the quoted market value of the gold is \$8,278 (December 31, 2010 - \$1,346)

8. RELATED PARTY TRANSACTIONS

The Company shares common administrative services and office space with related party companies, with directors and management in common and from time to time will incur third party costs on behalf of the related parties on a full cost recovery basis. The Company has a \$55 net receivable related to administration costs and other items outstanding as of December 31, 2011 (December 31, 2010 – \$104).

One of the companies that the Company administrative services and office space with has been unable to meet its obligations. The Company has provided an allowance totaling \$181.

The Company paid \$126 for legal services to a legal firm in which the Company's Corporate Secretary is a partner (December 31, 2010 - \$388). The Company has a \$4 payable related to legal costs outstanding as of December 31, 2011 (December 31, 2010 - \$39).

Key management personnel

The key management of the Company comprises the executive and non-executive directors, the members of the executive and the company secretary. Their compensation was as follows:

	2011	2010
Salaries and short-term employee benefits	\$ 2,916	\$ 2,421
Non-executive directors' fees	154	132
Share-based payments	4,082	3,745
	\$ 7,152	\$ 6,298

ENDEAVOUR SILVER CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(expressed in thousands of US dollars, unless otherwise stated)

The amount disclosed for share-based payments is the expense for the period calculated in accordance with IFRS 2, Share-based payments. The cost of a share-based payment award is spread over the vesting periods of the award. Therefore the charge in the period comprises parts of that year's awards and those of preceding years that vested within the period.

At December 31, 2011	\$ 39,477	\$ 28,799	\$ 21,457	\$ 2,061	\$ 1,734	\$ 93,528

As of December 31, 2011, the Company had \$850 committed to capital equipment purchases for 2012.

(a) **Guanacevi**

In June 2005, the Company acquired nine silver mining properties in the Guanacevi district, Durango, Mexico, from Industrias Peñoles S.A. de C.V. ("Peñoles"). The Company is required to send all mineral production from these properties to the Peñoles smelter in Torreon, Mexico, for smelting and refining. Peñoles retains a 3% net proceeds royalty on future production after deduction of all shipping and smelting costs, including taxes and penalties if any. In 2011, the Company paid \$2,228 in royalties (2010 - \$1,211)

On November 29, 2007, the Company signed an option to acquire a 100% interest in 15 properties within the San Pedro district in the state of Durango. The Company issued 120,000 common shares and 60,000 one-year warrants with an exercise price of \$4.65. The fair value of the warrants was determined to be \$48; the fair value was based on an expected stock price volatility of 55.5%, expected life of one year and an estimated risk-free rate of 3.98%. The warrants expired unexercised. During the year ended December 31, 2010, the Company issued 570,776 shares with a market value at the time of issuance of \$2,118 to acquire 100% of the properties.

ENDEAVOUR SILVER CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(expressed in thousands of US dollars, unless otherwise stated)

In February 2009, the Company signed an option agreement to acquire Porvenir Cuatro concessions located in the Guanacevi district for payments totaling \$700 over two years. The Company paid \$100 on ratification of the option and issued 136,426 shares equivalent to \$200. To acquire the property, the Company was required to issue an additional \$240 worth of shares within one year of the agreement date and \$160 in cash or shares within two years of the agreement date. During the year ended December 31, 2010, the Company issued 71,428 shares with a market value at the time of issuance of \$240 and paid \$160 to acquire the property.

Property concessions acquired by the Company in the Guanacevi District are maintained with nominal property tax payments to the Mexican government.

(b) Guanajuato

In 2007, the Company acquired the exploitation contracts and underlying assets to the Guanajuato silver-gold mines located in the northern parts of the Guanajuato and La Luz silver districts in the state of Guanajuato, Mexico.

In 2010, the Company acquired a 100% interest in 192 hectares titled the Belen properties, located in the Guanajuato district for total remuneration of \$200. The Company is required to pay a 2% net smelter return ("NSR") royalty on any production from the Belen properties.

The Company holds various property concessions in the Guanajuato District that it maintains with nominal property tax payments to the Mexican government.

(c) Parral

In August 2009, the Company acquired the option to acquire a 100% interest in the San Juanico properties by making \$130 payments over 18 months and a final payment of a minimum \$300 up to a maximum of \$1,900 based on the NI 43-101 compliant silver-equivalent resources at the exercise date (using gold as an equivalent based on a price ratio of silver and gold) within 24 months. The Company has paid \$130 of the option as of December 31, 2011. As of December 31, 2010, the Company had completed a NI 43-101 compliant resource estimate indicating silver equivalent resources to be less than 10 million ounces resulting in a final payment of \$300.

(e) San Sebastian

In February 2010, the Company acquired the option to acquire a 100% interest in the San Sebastian properties, located in Jalisco, Mexico by paying a total of \$2,750 over three years, of which the Company has paid \$300. Subsequent to year end, the Company made a \$150 payment. The Company is required to pay a 2% NSR royalty on any production from the San Sebastian properties.

(f) Panuco

In August 2011, the Company acquired the option to acquire 51% interest in the Panuco property, located in Durango, Mexico by paying a total of \$145 over one year, of which the Company paid \$75 on ratification of the option agreement and completing \$4,000 on exploration expenditures over 4 years. If the Company exercises its option to acquire 51% of the property a Joint Venture will be formed between the seller and the Company. The Company can acquire up to 70% of the Joint Venture by completing a resource estimate compliant with National Instruments 43-101 within 2 years of acquiring 51% of the property and completing a feasibility study within 4 years of acquiring 51% of the property.

(g) Lomas Bayas/Presidenta

In August 2011, the Company acquired the option to acquire a 100% interest in the La Presidenta property, located in Chile by paying a total of \$400 over three years, of which the Company paid \$15 on ratification of the option agreement. The agreement required a formula-based payment to the owners of the La Presidenta property within six months of the final option payment. The formula based payment would be payable in common stock based on NI 43-101 resource estimate, paying \$0.25 per silver equivalent ounce of reserves and measured and indicated ounces and \$0.15 per inferred silver equivalent ounce. A 2% NSR royalty would be paid on production of any subsequent discovered ounces. Subsequent to year end, the Company dropped its interest in the La Presidenta property resulting in a write off of \$65 of acquisition costs during 2011.

ENDEAVOUR SILVER CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(expressed in thousands of US dollars, unless otherwise stated)

In October 2011, the Company acquired the option to acquire a 100% interest in the Lomas Bayas properties, located in Chile by paying a total of \$2,500 over two years, of which the Company paid \$50 on ratification of the option agreement. The agreement required a formula-based payment to the owners of the Lomas Bayas properties within six months of the final option payment. The formula based payment would be payable in common stock based on NI 43-101 resource estimate, paying \$15 per gold equivalent ounce for reserves, measured and indicated ounces and \$10 per gold equivalent inferred ounce. Subsequent to year end, the Company dropped its interest in the Lomas Bayas property.

(h) Mineral property contingencies

Management believes the Company has diligently investigated rights of ownership of all of the mineral properties to a level which is acceptable by prevailing industry standards with respect to the current stage of development of each property in which it has an interest and, to the best of its knowledge, all agreements relating to such ownership rights are in good standing. However, all properties may be subject to prior claims, agreements or transfers, and rights of ownership may be affected by undetected defects.

10. PROMISSORY NOTE

In April 2009, the Company purchased \$918 of mining equipment from Sandvik Mining and Construction de Mexico SA de CV ("Sandvik"). The Company financed \$596 of the purchase by a promissory note, which was to be paid with equal installments over a 36 month period incurring simple annual interest of 10% on the outstanding balance. As of December 31, 2011 there is no remaining balance outstanding (Dec. 31, 2010 - \$287). The promissory note was recognized at amortized cost.

11. PROVISION FOR RECLAMATION AND REHABILITATION

The Company's environmental permit requires that it reclaim certain land it disturbs during mining operations. Significant reclamation and closure activities include land rehabilitation, decommissioning of buildings and mine facilities, ongoing care and maintenance and other costs. Although the ultimate amount of the reclamation and rehabilitation costs to be incurred cannot be predicted with certainty, the total undiscounted amount of probability weighted estimated cash flows required to settle the Company's estimated obligations is \$1,670 for the Guanacevi mine operations and \$858 for the Guanajuato mine operations.

The timing of cash flows has been estimated based on the mine lives using current reserves and the present value of the probability weighted future cash flows assumes a risk free rate specific to the liability of 1.51% for Guanacevi and 0.29% for Guanajuato and an inflation rate of 2.12% for Guanacevi and 1.64% for Guanajuato.

Changes to the reclamation and rehabilitation provision balance during the period are as follows:

Balance at January 1, 2010	\$	2,018
Changes during the period:		
Liabilities incurred at Guanacevi		269
Liabilities incurred at Guanajuato		90
Unwinding of discount for the period		147
Balance at December 31, 2010	\$	2,524
Changes during the period:		
Liabilities incurred at Guanacevi		100
Liabilities incurred at Guanajuato		75
Unwinding of discount for the period		30
Balance at December 31, 2011	\$	2,729

ENDEAVOUR SILVER CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(expressed in thousands of US dollars, unless otherwise stated)

12. CONVERTIBLE DEBENTURES

In February 2009, the Company issued CAN \$13,993 in 10% subordinated unsecured convertible redeemable debentures (the "Debentures") maturing February 2014. The interest was 10% annually, paid quarterly in arrears. At any time, each Debenture was convertible by the holder into one unit consisting of one of the Company's common shares and one half of a common share purchase warrant at an initial conversion rate of 526.3 units for each CAN \$1,000 Debenture, representing an initial conversion price of CAN \$1.90 per unit. Additional units would have become issuable following the occurrence of certain corporate acts or events. Each full share purchase warrant entitled the holder to purchase one common share at an exercise price of CAN \$2.05 per share. Subsequent to August 26, 2010, each Debenture could be redeemed by the Company for cash, plus a redemption fee of 7%, provided the closing share price was greater than CAN \$2.85 per share. In August 2010, the Company provided redemption notices to all debenture holders providing ten business days to convert all outstanding debentures, subsequently all outstanding debentures were converted. During the period of December 31, 2010, \$5,519 loss was recorded on conversion of Debentures to units.

The convertible debentures underlying unit is denominated in a currency other than the Company's functional currency and is therefore not considered to be indexed to the Company's own stock. Therefore, the conversion feature was separated from the host contract and accounted for as a derivative instrument. The liability element was recognized at amortized cost. The derivative liability was accounted for at fair value with adjustments recognized through the statement of comprehensive income. See note 14 for further detail on the derivative liability component.

Convertible debentures	
Opening balance at January 1, 2010	\$ 3,666
Opening accrued interest	254
Accretion expense	1,632
Interest paid	(989)
Loss on conversion into common shares	5,519
Conversion into common shares	(10,220)
Foreign exchange loss on revaluation	138
Closing balance as Dec 31, 2010	\$ -

13. SHARE CAPITAL

(a) The Company considers the items included in the consolidated statement of changes in equity as capital. The Company's objective when managing capital is to safeguard its ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new shares through private placements, convertible debentures, asset acquisitions or return capital to shareholders. As at December 31, 2011, the Company is not subject to externally imposed capital requirements.

(b) During the period 93,750 common shares, which were held in escrow as of December 31, 2010 were cancelled.

(c) **Public Offering**

In December 2010, the Company issued 8,710,000 common shares in a prospectus offering at CAN \$6.15 per common share for gross proceeds of CAN \$53,566. The agents received a cash commission of 5% totaling \$2,621, while other share issuance costs totaled an additional \$494 and have been included in equity.

ENDEAVOUR SILVER CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(expressed in thousands of US dollars, unless otherwise stated)

(d) Purchase Options

Options to purchase common shares have been granted to directors, officers, employees and consultants pursuant to the current Company's stock option plan approved by the Company's shareholders in fiscal 2009 at exercise prices determined by reference to the market value on the date of the grant. The stock option plan allows for, with approval by the board, granting of options to its directors, officers, employees and consultants to acquire up to 10% of the issued and outstanding shares at any time.

The following table summarizes the status of the Company's stock option plan and change during the period presented:

Expressed in Canadian dollars	Year Ended December 31, 2011		Year Ended December 31, 2010	
	Number of Shares	Weighted average exercise price	Number of Shares	Weighted average exercise price
Outstanding, beginning of period	4,665,000	\$3.17	5,187,700	\$2.63
Granted	1,330,000	\$8.22	1,819,000	\$3.73
Exercised ⁽¹⁾	(2,205,000)	\$3.02	(2,120,700)	\$2.39
Cancelled	(93,000)	\$3.56	(221,000)	\$2.49
Outstanding, end of period	3,697,000	\$5.07	4,665,000	\$3.17
Options exercisable at period-end	2,547,400	\$4.25	3,575,200	\$3.00

⁽¹⁾ 280,000 options priced with a weighted average price of CAN \$3.14 were cancelled in exchange for 189,580 share appreciation rights in the period ended December 31, 2011 (December 31, 2010 – 358,200 options priced with a weighted average price of CAN \$2.48 were cancelled in exchange for 136,870 share appreciation rights).

The following tables summarize information about stock options outstanding at December 31, 2011:

Expressed in Canadian dollars					
Options Outstanding			Options Exercisable		
Number Outstanding as at Dec. 31, 2011	Weighted Average Remaining Contractual Life (Number of Years)	Weighted Average Exercise Prices	Number Exercisable as at Dec. 31, 2011	Weighted Average Exercise Prices	
300,000	2.5	\$1.87	300,000	\$1.87	
40,000	5.5	\$2.01	40,000	\$2.01	
1,998,200	3.2	\$3.53	1,679,600	\$3.50	
10,000	3.8	\$4.57	2,000	\$4.57	
30,000	3.9	\$5.69	10,000	\$5.69	
1,293,800	4.5	\$8.19	510,800	\$8.19	
25,000	4.7	\$9.77	5,000	\$9.77	
3,697,000	3.6	\$5.07	2,547,400	\$4.25	

During the period ended December 31, 2011, the Company recognized stock-based compensation expense of \$4,858 (December 31, 2010 - \$4,529) based on the fair value of the vested portion of options granted in prior periods.

The weighted average fair values of stock options granted and the assumptions used to calculate compensation expense have been estimated using the Black-Scholes Option Pricing Model with the following assumptions for the period ended:

ENDEAVOUR SILVER CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(expressed in thousands of US dollars, unless otherwise stated)

	Year Ended December 31, 2011	Year Ended December 31, 2010
Weighted average fair value of options granted during the period	\$4.81	\$1.94
Risk-free interest rate	2.02%	2.17%
Expected dividend yield	0%	0%
Expected stock price volatility	77%	77%
Expected option life in years	3.86	3.65

Option pricing models require the input of highly subjective assumptions. The expected life of the options considered such factors as the average length of time similar option grants in the past have remained outstanding prior to exercise, expiry or cancellation and the vesting period of the grants. Volatility was estimated based on average daily volatility based on historical price observations over the expected term of the option grant. Changes in the subjective input assumptions can materially affect the estimated fair value of the options. The Company amortizes the fair value of stock options on a graded basis on a straight line basis over the respective vesting period of each tranche of stock options awarded. As of December 31, 2011, the non vested stock option expense not yet recognized was \$2,339 (December 31, 2010 - \$1,229) which is expected to be recognized over the next 18 months.

On May 26th, 2010, the Board of Directors approved a re-pricing of 15,000 employee options with weighted average remaining contractual life of 2.6 years and option price of CAN \$5.36. The re-priced options weighted contractual life remained 2.6 years, while the options will have an exercise price of CAN \$3.67 and a one year vesting period.

(e) Share Appreciation Rights Plan

The Company' share appreciation rights plan allows a participant the right (the "Right"), when entitled to exercise an Option, to terminate such Option in whole or in part by notice in writing to the Company and in lieu of receiving Common Shares pursuant to the exercise of the Option, and receive instead and at no cost to the participant that number of Common Shares, disregarding fractions, which, when multiplied by the market price on the day immediately prior to the exercise of the Right have a total value equal to the product of that number of Common Shares subject to the Option times the difference between the market price on the day immediately prior to the exercise of the Right and the Option exercise price. During fiscal 2011, 280,000 options (2010 – 358,200) were cancelled for the exchange of 189,580 share appreciation rights (2010 – 136,870).

(f) Stock Bonus Plan

As of June 2, 2009, shareholders approved a stock bonus plan whereby the Board of Directors have the authority to grant common shares without par value in the Company to the directors, executive officers and employees of the Company up to, in aggregate, a maximum of 250,000 common shares per calendar year. During the year, 3,600 (2010 – 41,500) common shares were granted to employees of the Company valued at \$39 (2010 - \$193) expensed as stock based compensation.

Balance at December 31, 2011	\$ 13,130	\$ -	\$ 13,130

(a) Warrants

Equity offerings were completed in previous periods whereby warrants were issued with exercise prices denominated in Canadian dollars. As the warrants have an exercise price denominated in a currency which is different to the functional currency of the Company (U.S. dollar), the warrants are treated as a financial liability. The Company's share purchase warrants are classified and accounted for as a financial liability at fair value with adjustments recognized through net earnings. The publicly traded warrants and warrants with similar characteristics were valued using the quoted market price as of exercise or at period end. For the non-publicly traded warrants, the Company uses Black-Scholes option pricing model to determine the fair value of the Canadian dollar denominated warrants. All warrants outstanding at December 31, 2011 will expire in 2014.

	Year Ended Dec 31, 2011	Year Ended Dec 31, 2010
Outstanding warrants valued using Black-Scholes	1,676,436	2,826,946
Weighted average fair value of warrants at period end	\$7.83	\$5.83
Risk-free interest rate	0.95%	1.92%
Expected dividend yield	0%	0%
Expected stock price volatility	62%	78%
Expected warrant life in years	2.2	3.1
Outstanding warrants valued using market quotes	-	3,430,267
Quoted market price at period end	-	\$3.75

(b) Debentures

The convertible debentures underlying units were denominated in a currency other than the Company's functional currency and is therefore not considered to be indexed to the Company's own stock. Accordingly, the conversion feature was separated from the host contract and accounted for as a derivative instrument. The derivative conversion option was valued using a bi-nominal lattice model taking into account underlying unit factors such as conversion price, volatility, risk-free rates, the Company's credit adjusted rates and dividend yield. On conversion of the debentures the liability amount was allocated to share capital and warrant derivative liability.

19. SEGMENT DISCLOSURES

The Company's operating segments are based on internal management reports that are reviewed by the Company's executive (the chief operating decision makers) in assessing performance. The Company has two operating mining segments, Guanacevi and Guanajuato, which are both located in Mexico as well as exploration and corporate segments. The exploration segment consists of projects in the exploration and evaluation phases in Mexico and Chile.

20. INCOME TAXES

(a) Tax Assessments

Refinadora Plata Guanacevi SA de CV's, a subsidiary of Endeavour, received a MXN\$63 million (US\$4.4 million) assessment on May 7th, 2011 by Mexican fiscal authorities for failure to provide the appropriate support for certain expense deductions in the 2006 tax return. During the audit process the Company retained an international accounting firm and external counsel to expedite the audit process and to ensure the delivery of the appropriate documentation. Based on the advice of our tax advisors and legal counsel, it is the Company's view that it provided the appropriate documentation and support for the expenses and the tax assessment has no legal merit, other than as follows: As a result of a detailed review by the Company of its accounting records and available information to support the deductions taken, the Company has estimated a potential tax exposure of \$425, plus an additional interest and penalties of \$460, for which the Company has made a provision in the consolidated financial statements for the period ended December 31, 2011. The Company has provided the government a 3% bond and has commenced the appeal process.

Minera Santa Cruz y Garibaldi SA de CV's, a subsidiary of Endeavour, received a MXN\$238 million (US\$17.0 million) assessment on October 12th, 2010 by Mexican fiscal authorities for failure to provide the appropriate support for certain expense deductions in the 2006 tax return. During the audit process the Company retained an international accounting firm and external counsel to expedite the audit process and to ensure the delivery of the appropriate documentation. Based on the advice of our tax advisors and legal counsel, it is the Company's view that it provided the appropriate documentation and support for the expenses and the tax assessment has no legal merit. As a result of a detailed review by the Company of its accounting records and available information to support the deductions taken, the Company has estimated a potential tax exposure of \$40, plus an additional interest and penalties of \$40, for which the Company has made a provision in the consolidated financial statements for the period ended December 31, 2011. The Company commenced the appeal process.

When circumstances cause a change in management's judgment about the recoverability of deferred tax assets, the impact of the change will be reflected in current income.

The reconciliation of the income tax provision computed at statutory rates to the reported income tax provision is as follows:

(b) Deferred Income Tax Liability

	December 31, 2011	December 31, 2010	January 1 2010
Mexico operations			
Deferred income tax assets:

Total financial liabilities	-	-	-	25,696	25,696	25,696

Fair value hierarchy

IFRS 7 establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. The fair values at December 31, 2011 are:

	Total	Level 1	Level 2	Level 3
	\$	\$	\$	\$
<u>Financial assets:</u>				
Investments	34,099	34,099	-	-
Total financial assets	34,099	34,099	-	-
<u>Financial liabilities:</u>				
Derivative liabilities	13,130	-	13,130	-
Total financial liabilities	13,130	-	13,130	-

ENDEAVOUR SILVER CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(expressed in thousands of US dollars, unless otherwise stated)

The three levels of the fair value hierarchy established by IFRS 7 are as follows:

Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical assets or liabilities.

Money market investments, marketable securities and notes receivable are determined based on a market approach reflecting the closing price of each particular security at the reporting date. The closing price is a quoted market price obtained from the exchange that is the principal active market for the particular security. As a result, these financial assets have been included in Level 1 of the fair value hierarchy.

Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly, for substantially the full contractual term.

The Company determines the fair value of the embedded derivative related to its Canadian dollar denominated common share purchase warrants based on the closing price that is a quoted market price obtained from the exchange that is the principal active market for the warrants for publicly traded warrants. For the non-publicly traded warrants, the Company uses Black-Scholes option pricing model to determine the fair value therefore this financial liability has been included in Level 2 of the fair value hierarchy.

Level 3: Inputs for the asset are not based on observable market data.

The Company has no financial assets or liabilities included in Level 3 of the fair value hierarchy.

(b) Financial Instrument Risk Exposure and Risk Management

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board approves and monitors the risk management process. The types of risk exposure and the way in which such exposure is managed is provided as follows:

Credit Risk

The Company is exposed to credit risk on its bank accounts, money market investments, notes receivable and value added tax receivable balance. Credit risk exposure on bank accounts and short term investments is limited through maintaining the Company's balances with high-credit quality financial institutions, maintaining investment policies, assessing institutional exposure and continual discussion with external advisors. The notes receivable credit risk exposure is limited by continual discussion with external advisors. Value added tax ("IVA") receivables are generated on the purchase of supplies and services to produce silver which are refundable from the Mexican government.

The carrying amount of financial assets represents the maximum credit exposure.

Below is an aged analysis of the Company's receivables:

	Carrying amount	Gross impairment	Carrying amount	Gross impairment	Carrying amount	Gross impairment
	December 31, 2011		December 31, 2010		January 31, 2010	
Less than 1 month	\$ 2,498	\$ -	\$ 2,276	\$ -	\$ 2,641	\$ -
1 to 3 months	3,485	4	3,177	-	2,262	-
4 to 6 months	21	8	2,720	-	1,318	-
Over 6 months	2,164	764	1,043	760	1,261	800
Total accounts receivable	\$ 8,168	\$ 776	\$ 9,216	\$ 760	\$ 7,482	\$ 800

ENDEAVOUR SILVER CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(expressed in thousands of US dollars, unless otherwise stated)

At December 31, 2011, 99% of the receivables that were outstanding over one month are comprised of IVA and income tax receivables in Mexico.

At December 31, 2011 an impairment loss of \$595 relates to IVA receivable amounts from prior years and \$181 relates to an allowance on related party receivables. At December 31, 2010 an impairment of \$760 relates to IVA receivable amounts from prior years.

Liquidity Risk

The Company ensures that there is sufficient capital in order to meet short term business requirements. The Company's policy is to invest cash at floating rates of interest, while cash reserves are to be maintained in cash equivalents in order to maintain liquidity after taking into account the Company's holdings of cash equivalents, money market investments, marketable securities and receivables. The Company believes that these sources, operating cash flow and its policies will be sufficient to cover the likely short term cash requirements and commitments.

In the normal course of business the Company enters into contracts that give rise to future minimum payments. The following table summarizes the remaining contractual maturities of the Company's financial liabilities and operating and capital commitments at December 31, 2011 are:

	Less than 1 year \$	1 to 3 years \$	4 to 5 years \$	Over 5 years \$	Total \$
Accounts payable and accrued liabilities	9,084	-	-	-	9,084
Income taxes payable	3,482	-	-	-	3,482
Provision for reclamation and rehabilitation	-	884	1,845	-	2,729
Capital expenditure commitments	850	-	-	-	850
Minimum rental and lease payments	268	550	565	165	1,548
Total financial assets	13,684	1,434	2,410	165	17,693

Market Risk

The significant market risk exposures to which the Company is exposed are foreign exchange risk, interest risk, and commodity price risk.

Foreign Currency Risk – The Company's operations in Mexico and Canada make it subject to foreign currency fluctuations. Certain of the Company's operating expenses are incurred in Mexican pesos and Canadian dollars, therefore the fluctuation of the U.S. dollar in relation to these currencies will consequently have an impact upon the profitability of the Company and may also affect the value of the Company's assets and the amount of shareholders' equity. The Company's convertible debentures were issued in Canadian dollars and related interest expense was incurred in Canadian dollars. The Company has not entered into any agreements or purchased any instruments to hedge possible currency risks.

The U.S. dollar equivalents of financial assets and liabilities denominated in currencies other than the US dollar as at December 31 are as follows:

	December 31, 2011		December 31, 2010	
	Canadian Dollar	Mexican Peso	Canadian Dollar	Mexican Peso
Financial Assets	\$ 65,339	\$ 12,228	\$ 59,317	\$ 18,346
Financial Liabilities	(14,086)	(7,586)	(30,652)	(6,640)
Net Financial Assets	\$ 51,253	\$ 4,642	\$ 28,665	\$ 11,706

Of the financial assets listed above, \$46,539 (2010 – \$43,743) represents cash and cash equivalents held in Canadian dollars, and \$3,839 (2010 - \$9,949) represents cash held in Mexican Pesos. The remaining cash balance is held in U.S. dollars. The money market investments and ABCP notes are denominated in Canadian dollars.

ENDEAVOUR SILVER CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(expressed in thousands of US dollars, unless otherwise stated)

As at December 31, 2011, with other variables unchanged, a 5% strengthening of the US dollar against the Canadian dollar would decrease net earnings by \$2,441 due to these financial assets and liabilities.

As at December 31, 2011, with other variables unchanged, a 5% strengthening of the US dollar against the Mexican peso would decrease net earnings by \$221 due to these financial assets and liabilities.

Interest Rate Risk – In respect of financial assets, the Company’s policy is to invest cash at floating rates of interest and cash reserves are to be maintained in cash equivalents in order to maintain liquidity. Fluctuations in interest rates impact the value of cash equivalents.

Commodity Price Risk – Gold and silver prices have historically fluctuated significantly and are affected by numerous factors outside of the Company’s control, including, but not limited to , industrial and retail demand, central bank lending, forward sales by producers and speculators, levels of worldwide production, short-term changes in supply and demand because of speculative hedging activities and certain other factors. The Company has not engaged in any hedging activities, other than short term metal derivative transactions less than 90 days, to reduce its exposure to commodity price risk.

Equity Price Risk – Fair values in the Company’s derivative liabilities related to the outstanding warrants are subject to equity price risk. Changes in the market value of the Company’s common shares may have a material effect on the fair value of the Company’s warrants and on net income. As at December 31, 2011, with other variables unchanged, a 10% strengthening of the market price of the Company’s common shares would decrease net earnings by \$1,609.

22. TRANSITION TO INTERNATIONAL FINANCIAL REPORTING STANDARDS

As stated in Note 2, these are the Company’s first consolidated financial statements prepared in accordance with IFRS. An explanation of how the transition from previous Canadian GAAP to IFRS has affected the Company’s financial position and comprehensive loss is set out in this note.

The accounting policies set out in Note 3 have been applied in preparing the financial statements for the period ended December 31, 2011, the comparative information presented in these financial statements for the period ended December 31, 2010 and in the preparation of an opening IFRS Statement of Financial Position at January 1, 2010 (the Company’s date of transition).

FIRST TIME ADOPTION OF IFRS

The Company has adopted IFRS on January 1, 2011 with a transition date of January 1, 2010. Under IFRS 1 *First time adoption of International Financial Reporting Standards* (IFRS 1), the IFRS standards are applied retrospectively at the transition date with all adjustments to assets and liabilities as stated under GAAP taken to deficit, with IFRS 1 providing for certain optional and mandatory exemptions to this principle.

The Company has elected to apply the following optional exemptions

Share-based payment transactions

IFRS 1 allows that full retrospective application may be avoided for certain share-based instruments depending on the grant date, vesting terms and settlement of any real liabilities. A first-time adopter can elect to not apply IFRS 2 to share-based payments granted after November 7, 2002 that vested before the later of (a) the date of transition to IFRS and (b) January 1, 2005. The Company has elected this exemption and will apply IFRS2 to only unvested stock options as at January 1, 2010 being the transition date.

Business Combinations

IFRS 1 allows that a first-time adopter may elect not to apply IFRS 3 *Business Combinations* (IFRS 3) retrospectively to business combinations prior to the date of transition avoiding the requirement to restate prior business combinations. The Company has elected to apply IFRS 3 to business combinations that occur on or after January 1, 2010.

ENDEAVOUR SILVER CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(expressed in thousands of US dollars, unless otherwise stated)

Decommissioning Liabilities

IFRS requires specified changes in a decommissioning or similar liability to be added or deducted from the cost of the asset to which it relates. The adjusted depreciable amount is then depreciated prospectively over its remaining useful life. IFRS 1 allows a first time adopter to not comply fully with these accounting requirements for changes in such liabilities that occurred before the date of transition and instead apply a simplified method which is set out in IFRS 1. The Company has elected this exemption.

Cumulative translation differences

IFRS 1 allows that a first-time adopter may elect to deem all cumulative translation differences to be zero at the date of transition. The Company has elected this exemption and as such the cumulative translation amount of \$212 previously included in other comprehensive income has been reallocated to deficit.

Borrowing Costs

Borrowing costs related to the acquisition, construction or production of qualifying assets must be capitalized under IAS 23(R). This is effective for fiscal years beginning on or after January 1, 2009, with earlier application permitted. IFRS 1 allows the effective date to be the date of transition to IFRS rather than January 1, 2009. The Company has elected this exemption and as such there is no difference between Canadian GAAP and IFRS on transition.

Fair value as deemed cost

The Company may elect either two options when measuring the value of its assets under IFRS. It may elect, on an asset by asset basis, to use either historical cost as measured under retrospective application of IFRS or fair value of an assets at the opening statement of financial position date. The Company has elected to use historical cost for its assets.

Reconciliation to previously reported financial statements

A reconciliation of the above noted changes is included in these following Consolidated Statements of Financial Position and Consolidated Statements of Comprehensive Income for the dates noted below. The effects of transition from GAAP to IFRS on the cash flow are not material; therefore a reconciliation of cash flows has not been presented.

Transitional Consolidated Statement of Financial Position Reconciliation – January 1, 2010

Consolidated Statement of Financial Position Reconciliation – December 31, 2010

Consolidated Statement of Operations and Comprehensive Income Reconciliation – December 31, 2010.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(expressed in thousands of US dollars, unless otherwise stated)

Adjustments on transition to IFRS:

The following is a summary of the significant accounting differences considered as part of the IFRS transition project and, where appropriate, the quantification of the adjustments required as of the transition date and for the comparative period.

Functional currency and foreign exchange translation

Canadian GAAP requires an entity to determine whether a subsidiary is an integrated or self sustaining entity based on the functional currency of the parent company. This determination dictates the method of foreign exchange translation for the consolidated financial statements. Under IFRS an entity is required to assess its functional currency independently for each entity within a consolidated group. The Company has completed its assessment and has determined that there is no change to the functional currency of its entities.

Componentization of mineral property, plant and equipment

IFRS requires entities to componentize all long lived assets and record amortization on a component-by-component basis whereas under Canadian GAAP the concept of componentization may not be applied on as rigorous a basis as under IFRS therefore differences in practice may arise. The Company has completed its assessment on all long-lived assets in order to determine if a material difference exists between the application of componentization under Canadian GAAP and that to be applied under IFRS. The Company has determined that there is no material impact.

Asset impairment

Both Canadian GAAP and IFRS require an entity to undertake quantitative impairment testing where there is an indication of impairment. Further there is a requirement under IFRS for the Company to assess whether indicators of impairment exist at the date of transition to IFRS.

Unlike Canadian GAAP, IFRS requires impairment charges to be reversed if circumstances leading to the impairment no longer exist. The Company has no historic impairment charges which could be reversed as of the transition date.

As at the transition date, there were no indications of impairment under IFRS identified by management, therefore no formal quantitative impairment was undertaken.

Adjustments on transition to IFRS:

(a) Share-based payment transactions

On transition to IFRS the Company has elected to change its accounting policy for the treatment of amounts recorded in contributed surplus which relate to vested stock options which expire unexercised. Under IFRS amounts recorded for expired unexercised vested stock options will be transferred to deficit on the date of expiry. Previously the Company's Canadian GAAP policy was to leave such amounts in contributed surplus.

Impact on Consolidated Statements of Financial Position

	December 31 2010	January 1 2010
Contributed surplus	\$ (5,724)	\$ (5,577)
Adjustment to deficit	\$ 5,724	\$ 5,577

A further difference is that IFRS 2 requires that forfeiture estimates be recognized in the period they are estimated and revised for actual forfeitures in subsequent periods, whereas under the Company's Canadian GAAP policy forfeitures of awards have been recognized as they occur. On application of the IFRS 1 exemption noted previously, this change in accounting was applied only to unvested awards as of the transition date.

Impact on Consolidated Statements of Financial Position

	December 31 2010	January 1 2010
Contributed surplus	\$ (118)	\$ (52)
Adjustment to deficit	\$ 118	\$ 52

ENDEAVOUR SILVER CORP.

Notes to the Consolidated Financial Statements

(expressed in thousands of US dollars, unless otherwise stated)

Impact on Consolidated Statements of Operations and Comprehensive Income

	Year ended December 31 2010	
Stock-based compensation	\$	(66)
Adjustment to comprehensive loss	\$	(66)

(b) Provision for reclamation and rehabilitation

The primary differences between IFRS and Canadian GAAP for reclamation and rehabilitation provisions include the basis of estimation for undiscounted cash flows, the discount rate, frequency of liability re-measurement and the recognition of a liability when a constructive obligation exists. Canadian GAAP requires a liability to be recognized when there is a legal obligation whereas IFRS expands the recognition principle by requiring that a liability be recorded if there is a legal or constructive obligation.

Canadian GAAP requires the estimate of undiscounted cash flows to be based on the amount that a third party would demand to assume the obligation, whereas IFRS focuses on management's best estimate of the expenditures required to settle the obligation. Under Canadian GAAP the discount rate used to determine the present value of the liability is the credit-adjusted risk free rate for the entity whereas IFRS requires the use of a discount rate that reflects the risks specific to the liability. Under Canadian GAAP the Company's provision for reclamation and rehabilitation is re-measured when there is a change in the amount or timing of cash flows required to settle the obligation whereas IFRS requires the re-measurement at each reporting date.

On consideration of the differences noted in the above paragraph, an adjustment is required to reflect the impact of applying a discount rate specific to the liability. The adjustment to the provision for the change in discount rate was recorded against mineral property, plant and equipment in accordance with the IFRS 1 exemption described above.

Impact on Consolidated Statements of Financial Position

	December 31 2010		January 1 2010	
Property, plant and equipment	\$	275	\$	278
Provision for reclamation and rehabilitation		282		278
Adjustment to deficit	\$	(7)	\$	-

Impact on Consolidated Statements of Comprehensive Income

	Year ended December 31 2010	
Depreciation and depletion	\$	7
Adjustment to comprehensive loss	\$	7

(c) Cumulative translation differences

At the date of transition under Canadian GAAP there was a cumulative translation adjustment relating to the Company's change in functional currency in 2007. The Company has chosen to apply the related IFRS 1 election and has eliminated the cumulative translation difference.

Impact on Consolidated Statements of Financial Position

	December 31 2010		January 1 2010	
Accumulated comprehensive income	\$	(212)	\$	(212)
Adjustment to deficit	\$	212	\$	212

ENDEAVOUR SILVER CORP.

Notes to the Consolidated Financial Statements

Years ended December 31, 2011 and 2010

(expressed in thousands of US dollars, unless otherwise stated)

(d) Warrant Derivative Liability

Under IFRS, the warrants issued by the Company with an exercise price denominated in a currency other than its functional currency must be classified as liabilities (as they do not meet the definition of an equity instrument) and are recognized at fair value with changes in fair value being recognized as a profit or loss. There is no such requirement under Canadian GAAP as warrants issued by the Company meet the definition of an equity instrument. The Company's outstanding warrants are denominated in Canadian dollars and the functional currency is the US dollar therefore the Company will recognize the warrants as a liability with changes to the fair value of the liability being recognized in net earnings.

The Company's publicly traded warrants were valued based on the quoted market value of these warrants as of January 1, 2010 and December 31, 2010 are classified in Level 1 of the fair value hierarchy. The non-publicly traded warrants have been valued using Black-Scholes valuation model and are classified in Level 2 of the fair value hierarchy.

Impact on Consolidated Statements of Financial Position

	December 31 2010	January 1 2010
Warrant derivative liability	\$ 29,348	\$ 7,823
Common shares	(1,594)	(3,719)
Adjustment to deficit	\$ 27,754	\$ 4,104

Impact on Consolidated Statements of Comprehensive Income

	Year ended December 31 2010
Mark to market loss on derivative liability	\$ (23,650)
Adjustment to comprehensive loss	\$ (23,650)

(e) Income Tax

There are a number of differences between Canadian GAAP and IFRS related to income taxes with the three that are most significant to the Company being the calculation of temporary differences on non-monetary items, the initial recognition exemption (the "IRE") on an asset acquisition and inflation adjustments on tax assets.

Initial recognition exemption

Under Canadian GAAP deferred tax liabilities ("DTL") arising from temporary differences at the date an asset is acquired are recognized using a circular calculation with the other side recognized against the asset. Under IFRS, in the circumstances described above, deferred tax is prohibited from being recognized. Under Canadian GAAP deferred tax was recognized using the above methodology for the Minera Santa Cruz y Garibaldi S.A. de C.V. and Metalurgica Guanacevi S.A. de C.V. asset acquisitions.

Calculation of temporary difference on non-monetary items

Under Canadian GAAP, deferred tax balances are calculated in the currency in which the taxes are paid and then converted to the accounting presentation currency at the current exchange rate whereas IFRS requires that deferred taxes be determined in an entity's functional accounting currency by comparing the historic non monetary accounting basis to the tax basis converted at the current exchange rate. Adjustments arise from this different treatment when an entity's functional currency differs from that in which the entity calculates and pays tax. The Company's adjustments for this difference primarily relate to the Mexican subsidiaries which have significant mineral property, plant and equipment balances recorded.

Inflationary adjustments on tax assets

Under Canadian GAAP, when the tax basis of assets is adjusted for inflation the inflationary impact is not recognized whereas under IFRS, the revaluation of the tax base for inflation is recognized in profit or loss.

	Year ended December 31 2010
Depreciation and depletion	\$ (322)
Foreign exchange gain (loss)	89
Deferred income tax expense	(887)
Adjustment to comprehensive loss	\$ (1,298)

(f) Convertible Debentures

Under Canadian GAAP, the asset, liability and equity components of the Company's convertible debentures are separately determined and classified on the consolidated statements of financial position. The asset portion represents the value of the Company's redemption option. The liability component represents the amortized cost of the host debt contract, while the equity component reflects the residual value at inception after determination of the fair value of the host debt contract and redemption option at inception. Transaction costs were allocated proportionately to the host debt and equity components at the inception date.

Under IFRS, due to the conversion option's exercise price being denominated in a currency other than the Company's functional currency, the holders' conversion feature is also considered an embedded derivative. As such all components of the convertible debentures are presented on the consolidated statements of financial position as financial liabilities. Under IFRS the conversion and redemption features were separated from the host contract and accounted for as a net derivative instrument.

Impact on Consolidated Statements of Financial Position

	December 31 2010	January 1 2010
Redemption option on convertible debentures	\$ -	\$ (2,693)
Liability portion of convertible debentures	-	(4,483)
