MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

The accompanying consolidated financial statements of Endeavour Silver Corp. (“the Company”) have been prepared by management in accordance with Canadian generally accepted accounting principles (GAAP), and within the framework of the summary of significant accounting policies disclosed in the notes to these consolidated financial statements.

Management is responsible for establishing internal controls over financial reporting for the Company. Management has designed and implemented internal controls over financial reporting (ICFR) that provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP.

The Audit Committee of the Board of Directors meets periodically with management to review results of the interim consolidated financial statements and related financial reporting matters prior to submitting the interim consolidated financial statements to the Board of Directors for approval. The Audit Committee is appointed by the Board of Directors and all of its members are independent directors. The Audit Committee is responsible for engaging or re-appointing the external auditors.

The interim consolidated financial statements have been approved by the Board of Directors on the recommendation of the Audit Committee.

Notes to the Consolidated Financial Statements

Three Months Ended March 31, 2008

(Unaudited – Prepared by Management)

(expressed in thousands of U.S. dollars, unless otherwise stated)

1. BASIS OF PRESENTATION

The Company's interim consolidated financial statements have been prepared in accordance with Canadian GAAP using standards for interim financial statements and do not contain all of the information required for annual financial statements. The statements follow the same accounting policies and methods of application as our most recent annual financial statements, except as described in Note 2. Accordingly, they should be read in conjunction with our most recent annual financial statements. All dollar amounts are disclosed in US currency unless otherwise stated.

Certain comparative figures have been reclassified to conform to the presentation adopted for the current period.

2. ADOPTION OF NEW ACCOUNTING STANDARDS

On January 1, 2008, the Company adopted five new accounting standards that were issued by the Canadian Institute of Chartered Accountants: Handbook Section 1506, *Accounting Changes*; Handbook Section 1535, *Capital Disclosures*; Handbook Section 3031, *Inventories*; Handbook Section 3862, *Financial Instruments – Disclosure* and Handbook Section 3863, *Financial Instruments – Presentation*.

- (a) Effective January 1, 2008, the Company adopted the new CICA guidelines of Section 1506, *Accounting Changes*, which establishes criteria for changing accounting policies, together with the accounting treatment and disclosure of changes in accounting policies, changes in estimates and correction of errors. As a result of adopting this new standard, changes in accounting policies are only permitted when required by a primary source of GAAP or when the change will result in more reliable and more relevant information. There were no changes in policies or estimates during the period, except for those new standards adopted and noted below.
- (b) Effective January 1, 2008, the Company adopted the new CICA guidelines of Section 1535, *Capital Disclosures*, which requires companies to disclose their objectives, policies and processes for managing capital, quantitative data about what the entity regards as capital, and whether companies have complied with externally imposed capital requirements and, if not in compliance, the consequences of such non-compliance.

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders.

The Company considers the items included in the consolidated statement of changes in shareholders' equity as capital. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new shares through private placements, asset acquisitions or return capital to shareholders. The Company is not subject to externally imposed capital requirements.

- (c) Effective January 1, 2008, the Company adopted the CICA guidelines of Section 3031, *Inventories*, which replaces Section 3030 of the same name. This standard harmonizes accounting for inventories under Canadian GAAP with International Financial Reporting Standards ("IFRS"). Under this standard, inventories are measured at the lower of cost and net realizable value. Similar inventories within a consolidated group are to be measured using the same method, and the reversal of previous write-downs to net realizable value are required when there is a subsequent increase in the value of inventories.

The Company's inventory balance consists of materials and supplies inventory, stockpile inventory, finished goods inventory and work-in-process inventory which are valued at the lower of cost and net realizable value. Cost is measured using the weighted average method. There are no write-downs or reversals of past write-downs. The application of this section did not have a significant impact on the Company's financial statements.

2. ADOPTION OF NEW ACCOUNTING STANDARDS (continued)

- (d) Effective January 1, 2008, the Company adopted the CICA guidelines of Section 3862, *Financial Instruments – Disclosures*, and Section 3863, *Financial Instruments – Presentation*. These standards replace CICA 3861, *Financial Instruments – Disclosure and Presentation*.

These standards increase the disclosures currently required, which will enable users to evaluate the significance of financial instruments for an entity's financial position and performance, including disclosures about fair value. In addition, disclosure is required of qualitative and quantitative information about exposure to risks arising from financial instruments, included specified minimum disclosures about credit risk, liquidity risk, and market risk. The quantitative disclosures must provide information about the extent to which the company is exposed to such risk, based on information provided internally to the entity's key management personnel.

- (i) Financial Assets and Liabilities

The Company's financial instruments consist of cash and cash equivalents, receivables, marketable securities, accounts payable, accrued liabilities and asset backed commercial paper. Cash and cash equivalents are designated as held for trading and therefore carried at fair value, with the unrealized gain or loss recorded in income. Marketable securities are available for sale with the unrealized gain or loss recorded in other comprehensive income. Interest income and expense are both recorded in income.

The fair values of cash and cash equivalents, accounts receivables, accounts payable and accrued liabilities approximate carrying value because of the short term nature of these instruments. The fair values of the asset backed commercial paper is determined by discounting the stream of future payment at the estimated prevailing market rates. There are no significant differences between the carrying values and the fair values of any financial assets or liabilities.

- (j) Financial Instrument Risk Exposure and Risk Management

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board approves and monitors the risk management process. The types of risk exposure and the way in which such exposure is managed is provided as follows:

Credit Risk

The Company's exposed to credit risk on its bank accounts, trade receivable and IVA receivable. Credit risk exposure on bank accounts is limited through maintaining its cash and equivalents with high-credit quality financial institutions. Trade receivables are generated on the sale of silver to a large Mexican refiner which the Company has deemed to have a high credit rating. IVA receivables are generated on the purchase of supplies and services to produce silver which are refundable from the Mexican government.

Liquidity Risk

The Company ensures that there is sufficient capital in order to meet short term business requirements, after taking into account the Company's holdings of cash equivalents, marketable securities and receivables the Company believes that these sources will be sufficient to cover the likely short term cash requirements and commitments.

2. ADOPTION OF NEW ACCOUNTING STANDARDS (continued)

Market Risk

The significant market risk exposures to which the Company is exposed are foreign exchange risk and commodity price risk.

Foreign Currency Risk – The Company's operations in Mexico and Canada make it subject to foreign currency fluctuations. The Company's operating expenses are primarily incurred in Mexican pesos and Canadian dollars, and the fluctuation of the US dollar in relation to these currencies will consequently have an impact upon the profitability of the Company and may also affect the value of the Company's assets and the amount of shareholders' equity. The Company has not entered into any agreements or purchased any instruments to hedge possible currency risks.

Financial assets and liabilities denominated in currencies other than the US dollar as at March 31, 2008 are as follows:

	Canadian Dollar	Mexican Peso
Financial Assets	12,838	6,933
Financial Liabilities	(473)	(5,649)
Net Financial Assets	12,365	1,284

As at March 31, 2008, with other variables unchanged, a 1% strengthening of the US dollar against the Canadian dollar would decrease net earnings by \$0.3m from use of financial instruments.

As at March 31, 2008, with other variables unchanged, a 1% strengthening of the US dollar against the Mexican peso would not have a significant impact on net earnings from use of financial instruments.

Interest Rate Risk – In respect of financial assets, the Company's policy is to invest cash at floating rates of interest and cash reserves are to be maintained in cash equivalents in order to maintain liquidity. Fluctuations in interest rates impact the value of cash equivalents.

Commodity Price Risk – The value of the Company's mineral resource properties is related to the price of silver and gold, and the outlook for these minerals. Silver and gold prices have historically fluctuated widely and are affected by numerous factors outside of the Company's control, including, but not limited to, industrial and retail demand, central bank lending, forward sales by producers and speculators, levels of worldwide production, short-term changes in supply and demand because of speculative hedging activities, and certain other factors. The Company has elected not to actively manage our commodity risk at this time.

6. RELATED PARTY TRANSACTIONS

The Company shares common administrative services and office space with related party companies and from time to time will incur third party costs on behalf of the related parties on a full cost recovery basis.

During the course of the period the company paid \$115,000 in consulting fees to a company with common directors and management.

The Company has paid \$7,000 for legal services to a legal firm in which the Company's corporate secretary is a partner.

The Company currently holds marketable securities purchased for \$279,000 of a public company with common directors and management that has a market value of \$94,000. The company currently holds securities purchased for \$160,000 of a private company with common directors that has a deemed market value of \$160,000.

7. LONG TERM INVESTMENTS

At March 31, 2008 the Company held ABCP purchased in August 2007 with a par value \$5.2 million and a fair value of \$3.9 million. At the dates the Company acquired the ABCP it was rated R1 (High) by Dominion Bond Rating Services ("DBRS"), the highest credit rating issued for commercial paper. The ABCP did not settle as it matured as a result of the liquidity issues in the ABCP market. There has been no active trading in the ABCP since mid-August 2007 and no market quotations are currently available.

There is a significant amount of uncertainty in estimating the amount of timing of cash flows associated with the ABCP. The Company estimated the fair value of its ABCP by discounting expected future cash flows considering the best available information. An adjustment of \$1.3 million was recorded for the year ended December 31, 2007 to reflect the lack of liquidity in the ABCP market. As result of the proposed restructuring, the Company has also concluded that the most probable outcome is that the ABCP will not be realized within a year and has accordingly classified the ABCP as a non-current asset. Due to illiquidity in the ABCP market, the Company estimated a 20% impairment from the face value of the asset and discounted the remaining value over a one year period using a discount rate of prime + 1%.

The Company has not been included within our broker's relief program and continues to discuss alternatives with our broker and legal counsel.

9. ASSET RETIREMENT OBLIGATIONS

Although the ultimate amount of the reclamation costs to be incurred cannot be predicted with certainty, the total undiscounted amount of estimated cash flows required to settle the Company's estimated obligations is \$2,047,000 which has been discounted using a credit adjusted risk free rate of 8.25%. Significant reclamation and closure activities include land rehabilitation, decommissioning of buildings and mine facilities, ongoing care and maintenance and other costs.

Changes to the reclamation and closure cost balance during the period are as follows:

Balance at December 31, 2007	\$ 1,578
Changes during the period:

(b) Purchase options

Options to purchase common shares have been granted to directors, officers, employees and consultants pursuant to the current Company's stock option plan approved by the Company's shareholders in fiscal 2006 at exercise prices determined by reference to the market value on the date of the grant. The stock option plan allows for granting options to its directors, officers, employees and consultants to acquire up to 6,768,000 shares.

The following table summarizes the status of the Company's stock option plan as at March 31, 2008 and changes during the period ended:

During the period ended March 31, 2008, the Company recognized stock-based compensation expense of \$1,029,000 (March 31, 2007 - \$317,000) based on the fair value of options granted.

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable single measure of the fair value of the Company's stock options.
