Bradford Cooke, CEO, commented, “Last year, Endeavour’s silver and gold production were significantly higher than our initial production guidance thanks to the turnaround in precious metal prices which allowed management to revise our production guidance upwards in July. I am pleased to say our operations team responded well and in general met the upward revised production targets in 2016.

“However, production was down year on year due to our decisions in January to significantly reduce spending on exploration and development in 2016 at low metal prices, which reduced our mine access and therefore metal production. We reversed those decisions at the end of the second quarter and restarted our exploration and development programs to once again expand resources and access reserves.

“We also acquired two high grade silver-gold development projects in the historic silver mining districts of Zacatecas and Parral, Mexico and advanced our exciting new discovery on the Terronera property. The company is now in a position to potentially build three new mines over the next three years to fuel Endeavour’s next phase of organic growth.”
